GRAFTED STOCK

The following list of grafted stock is for Spring delivery, 1931, ready for shipment after April 15th. All varieties are grafted on parent under-stock and are potted in 2½" and 2¼" deep rose pots, thoroughly hardened and rooted before shipment (some of the varieties like Koster Spruces, Weeping Beech, Cornus Florida, Biotas, and some of the Thujas are already in the cooling house), some of the items can be planted in the field-rows, and others it is advisable to plant in beds for one year with a little shade—about 50%. Stock marked with (*) needs to be shaded and planted in beds about 10" apart.

		per 10	per 100	per 1000
